

Fit is not a chair, Fit is not an easy chair, Fit can best be described as a seating net. A novel ergonomic object that does not necessarily look like something you can sit in at first glance; the typical horizontal seat is missing, which will probably surprise the viewer at first. Some people may think, how does that work? And: can it work at all? When not in use, Fit is a flat object with a net fabric stretched over the entire frame. It is divided into intelligent flexible and supporting zones. The bulge only appears when you sit down.

Everyone has to sit in Fit at least twice: the first time to be surprised, the second time to be convinced and enjoy the feeling. The intelligent net fabric with four different weave strengths ergonomically supports the different parts of the body, while the FlexZones give you the freedom you need to stretch out and relax.

Loll, lounge, snooze, read, watch TV

Talk, wait, look out the window.

Fit is a multi-optional seating net in which you can do almost anything.

The mobile notion of seating. Refreshing and comfortable.

Your body shapes the seat when you sit down. The supporting zones adjust to the user's weight by giving way backwards and downwards to create the ideal individual position for your body.

The headrest can be simply clamped to the frame. It offers an ideal position for relaxing and reading. The seat and headrest colours can be combined at random. Fit is available in the colours Black, White, May Green and Tomato.

Top-quality and ergonomic seating technology thanks to intelligent netting. Four different net zones, continuously woven, provide invisible seating comfort. Support function in the lumbar area, flex function in the important shoulder girdle area.
